Search by panels, arrays or single genes

GENETIC TESTING

- Patient Cohort Screening for Rare Diseases (e.g., Fabry disease)**
Sample registration and easy management for sponsored programs
- Disease Specific Testing**
Our selection of NGS panels, single gene analyses and genome-wide CNV analysis by Arrays
- Reproductive and Prenatal testing**
Testing for factors causing infertility and preconception carrier screening for severe conditions to help with pregnancy planning. This is complemented by non-invasive or invasive prenatal testing during pregnancy.
- Patient Monitoring (Biomarker follow up)**
Sample registration and easy management for monitoring purposes using CENTOGENE's sensitive and specific biomarkers
- Whole Genome & Whole Exome Sequencing**
Fast and cost effective one-step sequencing solutions with our whole exome or whole genome sequencing portfolio offering tailored solutions

3. You will see **Final** when reports are ready
